The graduate program in Intellectual Property Law was designed to provide its students with a thorough and substantive background in a variety of areas of intellectual property law including patent law, trademark law and copyright law. The program provides skills-based instruction in the practice of law in these areas including patent drafting and practice before the U.S. Patent and Trademark Office, litigating intellectual property disputes and drafting/negotiating agreements relating to intellectual property. Program outcomes for the Intellectual Property Law Program include:

#1 KNOWLEDGE OUTCOME: Graduates will achieve an understanding of the fundamentals of intellectual property law.

#2 - SKILLS OUTCOME: Graduates will demonstrate the ability to apply intellectual property law to a variety of situations.

#3 - ETHICS OUTCOME: Graduates will demonstrate the ability to effectively and ethically interact with, and on behalf of, the client.
